

WHY YOU CHOOSE ECOGLOBE ?

Circular Economy Value Chains

Working with a group of chemical science experts, we create non-toxic fiber planting containers, which are strictly controlled and use all-natural biodegradable materials. With our core competitiveness, we integrate a complete value chain of materials, production and sales.

Energy saving & carbon reduction

Our intelligent machinery and equipment can not only reduce the carbon footprint of transportation, but also significantly reduce the waste of time and cost. With renewable and recyclable vegetable fiber sources, we can maximize the utilization of raw materials and achieve zero-waste operating standards.

Diversity design

We abide by the three-tier design phase of "not only easy to use, but also beautiful and have favorable impressions". We have the core competitiveness of independent mold development and can provide a wide variety of customized packaging solutions.

Price flexibility

In the process of integrating mechanical equipment and finished product manufacturing, costs such as communication, personnel, transportation, and time are omitted, which can truly and effectively give back to consumers, making more people willing to step into the green industry chain and raising awareness of green energy.

Eco-Friendly Plant Fiber Containers: A RETURN TO NATURE

Innovative Fiber Planting Technology Return To Natural Life

The plant-fiber-made food containers are usually made from a variety of plant fiber raw materials compounded together in good proportion, comprising, sugarcane pulp, wheat straw pulp, wood pulp, etc.
